

Curriculum vitae: SIVA SATYENDRA SAHOO

PROFESSIONAL OBJECTIVE

About Me | I am a senior researcher with a demonstrated history of working in the field of Electronic System Design. I am currently working as an R&D Engineer with the Technology Enablement & Design (TED) group at IMEC, Leuven, in Belgium. Prior to joining IMEC, Leuven, I was working as a Senior Staff Engineer, in AI Computing with Samsung Advanced Institute of Technology (SAIT). Earlier, I had worked with the Chair of Processor Design, TU Dresden, on the design of low-cost accelerators for AI/ML applications, primarily targeted for embedded and cyber-physical systems. The design involved leveraging approximation and quantization techniques and innovations in system-, architecture- and IP-level for FPGA-based systems. My responsibilities in the research group also involved supervision of research interns and master's students, and teaching of course modules offered by the research group. My doctoral research was focused on optimizing the distribution of reliability methods across multiple layers of the system stack with appropriate scheduling of tasks on heterogeneous embedded systems. My prior research experience includes machine learning, reconfigurable systems and embedded system design.

Research Interests | Electronic Design Automation (EDA), AI/ML & EDA, Embedded System Design, RTL Design, Digital Synthesis, Electronic System-level Design, Reconfigurable Computing, Machine Learning, Digital VLSI, Approximate Computing.

INDUSTRY EXPERIENCE

since 01/2023 | **Senior Researcher**, Technology Enablement & Design (TED), Interuniversity Microelectronics Centre (IMEC), Leuven, Belgium
Individual contributor to the exploration of technology-aware architecture design for executing workloads at varying scales of computation. The project involves exploring the impact of semiconductor technology innovations on system-level design while also providing feasible directions for future technological innovations. One of the aspects being explored actively pertains to the investigation into the impact of provisioning *high-capacity on-chip memory*, using *novel devices/3D integration/heterogeneous integration*, for a variety of emerging workload scenarios.

08/2021–12/2022 | **Senior Staff Engineer**, AI Computing, SAIT, Samsung Semiconductor India Research, Bangalore, India
Individual contributor for modeling and DSE of AI computing architectures. Collaborator in the analysis and optimization of mapping AI workloads on modern inference engines.

08/2012–12/2014 | **Digital Design Engineer**, Intel India, Bangalore, India
Worked in the domain of *Physical Design* of dense VLSI System-on-chip. Was primarily responsible for design quality assessment of full-chip as well as design blocks.

07/2008–03/2010 | **Assistant Systems Engineer**, Tata Consultancy Services, India.
Worked in the domain of *Business Intelligence and Performance Management*. Primarily involved in using state-of-the-art tools for integrating data from heterogeneous sources for data analysis.

AWARDS AND ACHIEVEMENTS

- JAN. 2017 **HiPEAC Collaboration Grants**, HiPEAC4 Network of Excellence
2015 – 2018 **NUS Graduate Scholarship**, National University of Singapore, Singapore.
2010 – 2012 **MHRD (GATE) Scholarship**, Government of India, India
2004 – 2008 **CET Merit Scholarship**, CET, Bhubaneswar, India.

SKILLS

Design Skills | AI/ML, IP design (HLS and RTL), Physical design, EDA Tool design

Design Languages | VHDL, SystemC, Verilog

Programming Languages | C, C++, Python, MATLAB

EDA Tools | Xilinx Vitis & Vivado, Gem5

Language Proficiency | English, Oriya, Hindi

ACADEMIC RESEARCH EXPERIENCE

| | |
|-----------------|--|
| 02/2019–07/2021 | Post-doctoral Researcher , Chair for Processor Design, Computer Science Department, Technische Universität Dresden, Germany. Prof. Akash Kumar |
| 01/2015–02/2019 | Research Scholar (Ph.D.) at Signal Processing and VLSI Lab, Department of Electrical and Computer Engineering, National University of Singapore, Singapore. Prof. Bharadwaj Veeravalli and Prof. Akash Kumar |
| 02/2017–12/2017 | Guest Researcher , Chair for Processor Design, Computer Science Department, Technische Universität Dresden, Germany. Prof. Akash Kumar |

TECHNICAL EDUCATION

| | |
|-----------------|---|
| 06/2019 | DOCTORATE DEGREE, Doctor of Philosophy (Ph.D.) National University of Singapore, Singapore Grade: 4.0/5.0 |
| 01/2015–02/2019 | PhD Scholar at Department of Electrical and Computer Engineering Thesis: <i>A Cross-layer Reliability-integrated System-level Design Methodology for Heterogeneous Multiprocessor SoC-based Embedded Systems</i> . The thesis involved research into optimizing the distribution of reliability methods across multiple layers of the system stack during both design-time and run-time. |
| 09/2012 | MASTER'S DEGREE, Master of Technology (M.Tech) Indian Institute of Science, Bangalore, India Grade: First Class (6.6/8.0) |
| 07/2010–06/2012 | Electronics Design and Technology Project: <i>Hardware Accelerator for Support Vector Machines</i> . The project aimed at accelerating the training phase of Support Vector Machine using FPGAs for hardware/software co-design. |
| 12/2008 | BACHELOR'S DEGREE, Bachelor of Technology (B.Tech) Biju Patnaik University of Technology, Rourkela, India (College of Engineering and Technology, Bhubaneswar, India) Grade: 8.65/10.0 |
| 07/2004–06/2008 | Instrumentation and Electronics Engineering Project: <i>Short Message Service (SMS)-based Home Automation</i> . The project work involved the implementation of a wireless embedded system, using a mobile phone or a GSM modem, for the purpose of automation and control. |

PERSONAL DATA
